

Cube Garden Mist

The tank has a sand-blast processed glass in the back. By placing the tank in a well-lighted area, such as by the window, the back side glass diffuses the light softly, and makes aquarium bright. It matches very well with Cube Cabinet Mist 60. D type Glass cover is fit into the Cube Garden Mist.

Cube Garden Mist R type

This is a new type of Cube Garden produced with a sand-blast processed curved glass covering the both side and backside of aquarium. It does not have silicon gluing connection in the back corners, and you can make a wide layout expression. The sand-blast processed glass makes a light diffusion effect when lighted from the back side.
